JOURNAL OF

THE GEOLOGICAL SOCIETY

Volume 156 1999

Chief Editor: Professor I. J. Fairchild

Editors: Dr R. Burgess, Dr J.A. Crame, Dr R. England, Dr S. A. Gibson, Dr J. Gilbert, Dr M. J. Hambrey, Dr P. Haughton, Dr J. A. Howell, Dr A. J. Maltman, Dr J. M. McArthur, Professor R. Parrish, Dr D. Pirrie, Dr G. Rogers, Dr N. W. Rogers, Dr H. R. Rollinson, Dr R. A. Strachan.

Advisory Editors: Dr R. E. Bevins, Professor M. Brown, Professor J.-P. Brun, Professor D. Bruton, Dr P. A. Cawood, Dr M. A. Cooper, Dr J. C. W. Cope, Professor R. Dingle, Dr M. H. Dodson, Professor D. Elliot, Professor K. A. Foland, D. Dr J. Francis, Professor F. T. Fürsich, Professor R. O. Greiling, Dr N. B. W. Harris, Dr R. T. Haworth, Dr A. J. Hurford, Professor D. A. Nieuwland, Dr R. J. Pankhurst, Professor J. Rose, Professor P. D. Ryan, Dr N. J. Soper, Dr P. Stone, Professor C. J. Talbot, Professor D. H. Tarling, Professor H. Weissert, Professor R. S. White.

> But if any human being earnestly desire to push on to new discoveries instead of just retaining and using the old; to win victories over Nature as a worker rather than over hostile critics as a disputant; to attain, in fact, clear and demonstrative knowledge instead of attractive and probable theory; we invite him as a true son of Science to join our ranks.

Thematic sets of papers in Volume 156

TIGGER (Part 2)
Unravelling Tectonic and Climatic Signals in Sedimentary Successions (Part 4)
Current Controversies in the Caledonides (Part 6)

Dates of issue of Volume 156

Part 1 (for January):	pages 1–208	4 January 1999
Part 2 (for March):	pages 209–448	1 March 1999
Part 3 (for May):	pages 449–656	27 April 1999
Part 4 (for July):	pages 657–864	6 July 1999
Part 5 (for September):	pages 865–1055	24 August 1999
Part 6 (for November):	pages 897–1064	25 October 1999

Discussions on previously published papers

On the coastal flexure of Disko (West Greenland), onshore expression of the 'oblique reflectors' [CHALMERS, J. A., WHITTAKER, R. C., SKAARUP, N. & PULVERTAFT, T. C. R.; reply by GEOFFROY, L, SKUCE, A. G., ANGELIER, J., GELARD, J. P., LEPVRIER, C. & OLIVIER, P.] 1051
On the erosional and uplift hisotry of NE Atlantic Passive margins: constraints on a passing plume [DAM, G., LARSEN, M., NØHR-HANSEN, H. & PULVERTAFT, T. C. R.; reply by CLIFT, P. D., CARTER, A. & HURFORD, A. J.] 653
On evidence from the Gediz graben for episodic two-stage extension in western Turkey [SEYITOĞLU, G.; *reply by* KOÇYĞIT, A., BOZKURT, E. & YUSUFOĞLU, H.] 1240
On garnet provenance studies, juxtaposition of Laurentian marginal terranes and timing of the Grampian Orogeny in Scotland [STONE, P. & EVANS, J. A.; reply by HUTCHISON, A. R. & OLIVER, G. J. H.] 205
On the influence of country rock structural architecture during pluton emplacement: the Loch Loyal syenites, Scotland [TALBOT, C. J.; *reply* by HOLDSWORTH, R. E., MCERLEAN, M. A. & STRACHAN, R. A.] 1237
On oceanic plateau formation: a cause of mass extinctions and black shale deposition around the Cenomanian–Turonian boundary [HALLAM, A.] 208
On syntectonic emplacement of the Maladeta granite (Pyrenees) deduced from relationships between Hercynian deformation and contact metamorphism [GARCÍA-SANSEGUNDO, J. & POBLET, J.; reply by EVANS, N. G., GLEIZES, G., LEBLANC, D. & BOUCHEZ, J.L.] 651
On transcurrent fault activity on the Dead Sea Transform in Lebanon and its implications for plate tectonics and seismic hazard [FLEURY, J., CHOROWICZ, J. & SOMMA, J.; reply by BUTLER, R. W. H., SPENCER, S. & GRIFFITHS, H. M.] 1243
On transpression and transtension zones [LIN, S. JIANG, D. & WILLIAMS, P. F.; reply by DEWEY, J. F., HOLDSWORTH, R. E. & STRACHAN, R. A.] 1045

ERRATA

155, A. R. Cruden, On the emplacement of tabular granites.

Page 858

Equation 2 should be:

$$Q_E = \frac{dV}{dt} = \frac{\pi r^2}{6}\frac{dh}{dt}$$

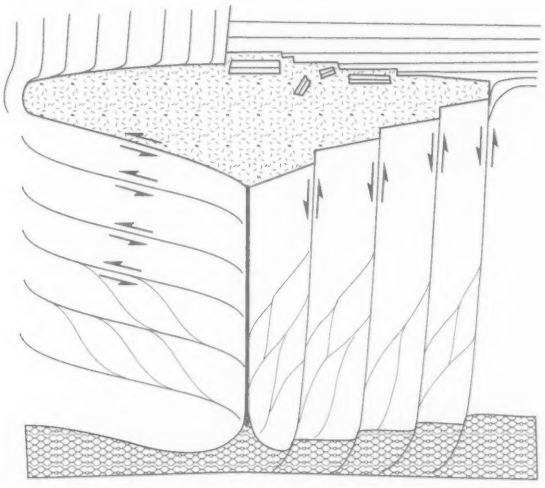
Equation 4 should be:

$$\dot{\gamma}_c = \frac{1}{r}\frac{dh}{dt} = \frac{6Q_E}{\pi r^3}$$

Equation 5 should be:

$$Q_E = \frac{\pi r^2}{2}\frac{dh}{dt}.$$

Page 860, in Fig. 10, the double arrows on the shear zones on the left-hand side should indicate reverse, not normal shear sense (correct figure printed below).



156, Rose *et al.* pp. 439 & 440. The figure printed as Fig. 5 is the correct version of Fig. 4. The figure printed as Fig. 4 is an earlier version of this figure. The last sentence of the caption to Fig. 5 (◆ values are derived from soil cement and ○ are derived from marine molluscs) should be with the caption of Fig. 4.

The correct Fig. 5 is printed overleaf.

156, Owen *et al.* pp. 457–464. The last sentence of abstract on page 457 should read: 'These localized uplift rates support the view that the Gobi Altai Mountains probably took between 50 and 2.5 million years to form and were, therefore, coeval with the uplift of the Himalayas and the Tibetan Plateau.'

The last part of the first sentence in the second to last paragraph on page 462 should read: 'it follows that the Gobi Altai was probably uplifted over a period between 50 and 2.5 million years.'
